COURAGE

At EA your child will grow with authentic learning experiences. Our programs actively engage students in their own learning and do not have them sit passively in classrooms, waiting for the content to be delivered to them.

THIS IS EA

We are committed to educating the whole child – which is a holistic approach that includes students' academic performance in addition to their social-emotional health and well-being.

AUTHENTIC LEARNING

Your child will learn in an environment that is kind and nurturing, fostering supported learning throughout the educational journey. From a STEAM education focus to Smart Labs and a LEED registered FabLab, to highly challenging AP courses and programs, Escuela Americana remains an institution that recognizes and values both tradition and educational change.

Each student's education is personalized through a solid system of support. They will receive **AUTHENTIC LEARNING EXPERIENCES, GLOBAL PERSPECTIVES, AND GLOBAL COMPETENCES** through a broad, flexible curriculum that is individually tailored to their interests, talents, and abilities.

CREATIVE
CURRICULUM

YOUR CHILD WILL LEARN AT A PERSONALIZED PACE THROUGH ENGAGING ACTIVITIES THAT MAKE LEARNING EXCITING AND FUN.

THE EARLY CHILDHOOD YEARS ARE A SPECIAL PERIOD IN THE LIVES OF YOUR CHILD.

During this time, children begin to trust people outside of their families.

They start to gain independence, self-control, learn to take initiative and assert themselves in socially acceptable ways.

They become keen observers who experiment to find out what happens when they interact with other people and manipulate materials as their language skills surpass the limited vocabulary and sentence structure of toddlers.

YOUR CHILD WILL EXPERIENCE A WELL-ROUNDED LEARNING ENVIRONMENT THAT FOCUSES ON LITERACY, ART, MATH, MUSIC, AND SCIENCE THROUGH PLAY.

Play provides the foundation for academic learning. It is the preparation your child needs before learning highly abstract symbols such as letters and numbers.

YOUR CHILD WILL

become

- **INDEPENDENT**
- **SELF-CONFIDENT**
- **INQUISITIVE**

BUILDING LEADERS

Our students will be supported as they prepare to become successful global citizens in a rapidly changing world. We develop your child's knowledge, critical thinking and problem-solving skills, and nurture curiosity, creativity, and resilience – empowering every child to reach their fullest intellectual, social and creative potential.

EA OFFERS A RICH AND EXPANSIVE ACADEMIC PROGRAM THAT REQUIRES STUDENTS TO PLAN AND MAKE DECISIONS BASED ON THEIR PERSONAL STRENGTHS, GOALS AND INTERESTS.

The Secondary Model (Grades 6-12) aligns curriculum, promotes innovation and increases collaboration. The goal is to strengthen social-emotional achievement as well as build a stronger one-school community for our students.

Our students are offered a rigorous academic program that will enable them to enroll successfully in the higher education institution of their choice and have a seamless transition into the university environment.

We encourage all students to be involved in the Advanced Placement (AP) Program during their secondary years at EA. They will be offered the opportunity to have an academic experience that is advanced and as challenging as the college level, thus becoming a more competitive applicant for university admissions.

STEAM

**Imagine a classroom where learning is truly personalized
and students are intrinsically motivated to achieve
more than they ever thought possible.**

Through problem solving with real-world connections and technology your child will be ready to compete in this ever-changing world and the global marketplace of the future.

STEAM is a curriculum based on educating our students in the disciplines of

- **SCIENCE**
- **TECHNOLOGY**
- **ENGINEERING**
- **ARTS**
- **MATHEMATICS**

Students will get hands-on experiences and unstructured time to explore and invent.

We have **two STEAM LABS and one Fabrication Lab**, where they will problem-solve, collaborate, communicate and build the skills necessary for college and career success as they become the new generation of leaders.

COUNSELING PROGRAM

We care for your child's well-being. Through our counseling program, we address the **ACADEMIC, SOCIAL-EMOTIONAL, CAREER, AND GLOBAL DEVELOPMENTAL NEEDS** of your child. Our counselors offer personalized guidance and support to all our students (PK-12) in order to facilitate a clear understanding of their personal, emotional, social, and academic needs as they mature and develop.

Your child will be empowered with the necessary tools to become positive, healthy, self-fulfilling members of the school community and society in general.

COLLEGE COUNSELING

As an EA student, your child will have the opportunity to be admitted to prestigious universities and colleges around the world and may be awarded financial aid and scholarships by many top universities.

Since 9th grade, our students are guided by the College Counseling department and supported in order to undergo the college admissions process of colleges and universities around the world.

A HEALTHY BALANCED LIFE

Your child will notice what is, reflect, and focus on improving mental and physical health. The Wellness Program helps alleviate some of the modern-day stress our youth are feeling. We know that your child is more capable of learning when emotional needs are met and want to help facilitate this optimal state for our community of learners.

Our social-emotional programming integrates with RULER, an evidence-based approach developed at Yale University's Center for Emotional Intelligence. RULER aims to increase emotional literacy and create a space where emotions become central to learning and teaching. Its research has demonstrated an improvement in student engagement, academic performance, and better decision-making.

EXPLORING IMAGINATION

The Arts are essential to the development of the whole child.

Music, Drama, and Visual Arts are magnificent experiential vehicles for discovering the value of discipline, solidarity, imagination, and teamwork. Actively learning by doing, students express themselves creatively, take responsibility for their roles, and communicate with an audience.

Starting in Pre-Kinder and continuing through 12th grade, students have numerous opportunities to participate in the Arts: curricular music, drama, visual arts classes, bands and choirs, musicals, art exhibits, drama productions, talent shows, and more.

AN ACTIVE LIFESTYLE

Your child will have a world of possibilities with a wide athletics program that offers different sports from soccer to wall climbing to track and field. Our students learn transferable skills such as sportsmanship, attitude, communication, teamwork, and the importance of commitment and dedication.

We offer the following sports: **Soccer, Volleyball, Basketball, Handball, Track and Field, Cross Country, Wall Climbing, Weight Training.**

OUR
biggest job
IS TO CREATE
SUCH AN
ENVIRONMENT
THAT ALLOWS
YOUR CHILD TO
connect, create
and explore
FOR A WHOLE LIFE.
